A Warner Communications Company 

THE ESSENTIAL PAC-MAN

At 10 points each, these
are a dot-chomper's delight.

INSERTING THE CARTRIDGE AND JOYSTICK CONTROLLERS

Turn on the ATARI® Home Computer by pressing the power switch on the right side of the console to ON. Pull the release lever towards you to raise the cartridge door. (Whenever you do this the computer automatically turns itself off.)

Insert the PAC-MAN game cartridge into the slot (the left cartridge slot in the ATARI 800™ Home Computer) with the label facing you. Press down carefully and firmly. Close the cartridge door, and the computer turns on again.

For one player, plug a Joystick Controller into Controller Jack 1. For two players, plug a second Joystick Controller into Controller Jack 2. Hold the Joystick so the red button is in the upper left corner.

THE SELECT KEY

Press the SELECT key on the computer for a two-player game. Press it again to return to a one-player game.

THE START KEY

Press the START key on the computer to begin the game or restart the game at any time. The button on the Joystick will also start your race through the maze unless you're in the middle of a game.

TURNS REMAINING

Two big lips smacking in the middle of your face,
Chomping on those dots to stay ahead in this race.
Stay ahead of those goblins, cause they're trouble no doubt.
Get yourself nabbed just three times and you're out.
But there's good news for you when you rack-up the score!
Reach 10,000 points and you get one turn more!

Bite an **energy dot** and the goblins turn blue,
And that means **50 more points** for you.

It's also your chance to turn the table,
So chase those goblins and bite while you're able.

The more goblins you grab, the more points you score.

200, 400, 800, then more!

But when they start blinking, you better turn track,
'Cause that's when the goblins' true colors come back.

**Look out,
Pac-Man!**

The goblins are coming,
they're on the
attack, man.

You like to chomp
dots, but they like
chomping PAC-MAN.

 Blinky is fastest,
so watch where
he goes.

 Pinky is sneakier
than anyone knows.

 Inky has quite a
few tricks up his
cape.

 Clyde cuts you
off so there's
just no escape.

SKILL LEVEL

**Keep goin',
Pac-Man!**

There's plenty of **dots** in the goblin neighborhood!
And at **10 points each**, they're lip-smacking good!

Watch out for these gobbling goblins — they're nothing but trouble.

Eat an energy dot and you can gobble those goblins back.

For an extra treat, keep your eyes open for tasty bonus nuggets.

THE OPTION KEY CHANGES DIFFICULTY

Press the OPTION key to change the level of difficulty you start at — represented by symbols below the maze. Cherries are the least difficult. Each time you press the option key the symbol changes, from cherries to a strawberry and so on up the scale.

THE SYSTEM RESET KEY

The SYSTEM RESET key on the computer resets the game, returning to the one-player selection and the lowest skill-level option. The high score from any previous game is retained on the screen, until the computer is turned off.

THE SPACE BAR PAUSES THE GAME

Press the SPACE BAR on the computer if you want to pause in the middle of a game. Press the SPACE BAR a second time to pick up where you left off.
