BASIC RULES

- Battles are one-on-one matches of 3 rounds, and the first to win two rounds wins.
- When either of the fighter's life energy runs out, the round ends and the player without life energy loses.
- One round consists of 90 "seconds." (FATAL FURY 1 & 2) 60 seconds (FATAL FURY SPECIAL & FATAL FURY 3) If no one wins before time runs out, the character with the most life energy remaining wins.
- Both fighters competing have their life energy completely restored whenever a round ends and the next round is carried out.
- The game ends in a draw when there is a double knockout or both players have the same amount of remaining life when time runs out.
- When neither player wins two rounds as the third round ends, you go into an extra round (up to a maximum of 10 rounds (FATAL FURY 1, 2 & Special). In FATAL FURY 3 If both characters have an equal number of wins when the final round ends, the winner is decided in the extra round. This round is played with an even shorter time limit than the final round and begins with both fighters given a minimal amount of life energy (the Life Gauge flashes red).

TWO-PLAYER, BURST-IN, AND TWO-PLAYER CO-OP PLAY

To start a Two-Player battle in any FATAL FURY game push the START Button of the unused controller before selecting a character from the character select screen. You can also push the START Button of the unused controller during a single-player computer battle, the game is interrupted and a Burst-In two-player game is started. FATAL FURY 1 features a Two-Player Cooperation mode. Start a Co-op battle by either bursting in on a single-player game or by selecting your characters at the beginning of the game and then choosing any area other than "1P vs 2P" on the Area Select screen. Please note you cannot use burst-in play during the final battle against Geese. When you defeat a computer character in two-player cooperative play, a two-player battle begins and the winner goes on to fight a computer character in a single-player battle.

FATAL FURY

The ruler of Southtown's underworld, Geese Howard. This year, too, sees the sponsor of the "King of Fighters" with his abilities in tip-top condition. Meanwhile, Terry and Andy, the Brothers Bogard, whose adoptive father was killed by Geese a decade ago, have been training hard and arrive in Southtown thirsting for revenge. But it's no mean feat getting close to Geese, who rules this town behind the scenes. Then one man appeared before the avenging twosome. His name? Joe Higashi. Joe, who's come to participate in the mightiest of martial arts tournaments, reveals to Terry and Andy that the event's sponsor is none other than Geese himself. The Brothers Bogard decide to enter the tournament. And finally the day for the event arrives... what will be the outcome of this "Fateful Battle" ...?

But in that very tournament, Geese was defeated by the two destined to take him down. Defeated by that fateful duo, Geese met his end without ever confronting Krauser. One year later, Southtown, with Geese now gone, experienced a new period of peace in turmoil's stead. But one day, invitations sent by an unknown sender found their way to Terry, Andy, and Joe "...This year, too, I invite you to the time-honored King of Fighters." But Geese is supposed to be dead! Who could have sent this? Although all remains a mystery, the curtain now rises on "A New Battle."

SYSTEM DESCRIPTIONS

Two-Plane Battle

There are two planes, one in the foreground and another in the background, and characters can battle moving freely between these.

Line Move

This lets you jump to a different plane while your opponent is on the same one as you. It's a handy technique to evade attacks. You can roll forward by pushing the ↑↓ directional buttons while your opponent is on a different plane.

Line Move Attack

When your opponent is on a different plane, you can jump to his plane and attack simultaneously. There is no variance in strength to Line Move Attacks, but the height of jumps does vary. Using a punch attack button produces a low jump and a kick attack button produces a high jump. You can also attack from a distant position.

Super Power Attack

This lets you make a powerful attack to knock an opponent to a different line. Time these right to add more punch to your repertoire of moves.

Evasion Attack

This lets you make a counterattack from a guard position while evading an opponent's attack. This is a lifesaver when your opponent has you on the ropes.

Super Special Move

When a slight amount of life remains in your Life Gauge and it flashes red, you can use a Super Special Move with power surpassing Special Moves. If you strike your opponent with this, it will significantly reduce your opponent's life energy.

These secret scrolls, written in the age of the first emperor Jin before the birth of Christ, were divided into three separate scrolls, and when they are all brought together, it is said, their true power will be known.

Even in this current age, over two thousand years after their creation, the legend of these secret scrolls is still spoken of, and bloody battles to obtain these continue to rage endlessly. SYSTEM DESCRIPTIONS

Oversway System

In addition to the main line where characters usually battle it out, there are two other lines (for a total of three)—one in the foreground and one in the background. Battles are normally waged on the main line, but you can Oversway (an evasion move) from the main line to the foreground or background plane. Your character automatically returns to the main line after making an Oversway move.

Oversway Attack & Anti-Oversway Attack

Using a punch or kick during an Oversway move lets you return to the main line while making an attack. This lets you counterattack quickly after having evaded an opponent's attack. Conversely when your opponent makes an Oversway move to the foreground or background, you can use an Anti-Oversway Attack to turn the tables.

Quick Sway

You can shift your torso at any point in the game to evade an enemy attack. While making a Quick Sway move, you can also attack using any of the normal attack buttons.

Aerial Guard

Use a guard command during a jump to block normal attacks or certain flying objects from Special Moves.

Evasion Attack

This lets you make a counterattack from a guard position while evading an opponent's attack. This is a lifesaver when your opponent has you on the ropes.

Combination Arts

These are combo moves for linking attacks that cancel one normal attack and go to another. You need to push punch and kick buttons following a designated order (some require directional button command inputs) to use these. Each character has a number of these moves so look for them by trying a variety of combinations and taking a hint from the example below.

Example for Terry: Near opponent, ← or → + XOOOΔ and Combo Attack

Super Special Moves

When a slight amount of life remains in your Life Gauge and it flashes red, you can use a Super Special Move with power surpassing Special Moves. If you strike your opponent with this, it will significantly reduce your opponent's life energy.

Hidden Abilities

These are powerful moves that far surpass Super Special Moves and provide the potential to win a round with one punch. To use these, you must follow the steps shown below and put your character into Super Mode. And when your Life Gauge flashes red in Super Mode, enter the designated commands in the right circumstances to activate these. Hidden Abilities, however, unlike Super Special Moves, can only be used once a round.

Setting up Super Mode

When the first round begins, push the Light Punch, Light Kick, Strong Punch, and Strong Kick Buttons down simultaneously.

Push the START Button when the "GO!" message appears on the screen.

When the character's name shown below the Life Gauge turns from white to green, Super Mode set-up is complete.

*See p. x for more details on Hidden Ability commands.

THE PAUSE MENU

Pressing the START Button during a battle calls up the Pause Menu described below. Pushing the START Button a second time resumes game play.

CONTINUE: Resumes the battle.

CONTROLS: Calls up the Controller Setup, allowing you to customize your controller.

GAME END: This ends the battle and lets you choose to return you to the Title Screen for the game you're currently playing or the Main Menu Screen.
